TITLE	Statistical Abstracts--Fall 1994: Instructional Workload, Faculty, and I&DR Costs [and] Supplement--Trends of Selected Indicators by Discipline Category, Fall 1975 to Fall 1994.
INSTITUTION	State Univ. of New York, Albany. Central Staff Office of Institutional Research.
PUB DATE	94
NOTE	493p.; Not available in paper copy due to small print. For the previous edition, see ED 341 319.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF02 Plus Postage. PC Not Available from EDRS.
DESCRIPTORS	Comparative Analysis; *Credits; *Expenditure per Student; *Faculty Workload; *Full Time Equivalency; Graduate Study; Higher Education; Intellectual Disciplines; Interaction; *Program Costs; School Statistics; State Colleges; *State Universities; Statistical Analysis; Trend Analysis; Undergraduate Study
IDENTIFIERS	Contact Hours; *State University of New York

ABSTRACT

This publication provides summary analytical reports and graphic displays from the official Course and Section Analysis (CASA) system concerning the instructional workload and the financial resources of academic departments offering courses during the fall 1994 semester within the State University of New York system. The first of six reports within this document provides 103 tables, all of which include summaries by institution type followed by individual institution displays of selected cost factors by discipline category. Report 2 exhibits the percentage distribution of weekly faculty and weekly student contact hours for classes, laboratory, tutorial, independent, and programed settings. Report 3 is a series of report displays for each course level of the percentage distribution of student credit hours by student level. Report 4 contains reports that show personnel positions and the following: credit hour producing activities, other than credit hour producing activities, state funded teaching titles, and activities of teachers on other assignments. Report 5 displays the percentage of student workload for each of 19 discipline categories and shows trends from Fall 1975 to Fall 1994. Report 6 (much of it in a separate supplement) identifies trends and displays basic information for each institution, every institution type, and all institutions for the 1975 to 1994 period. (JB)

STATISTICAL ABSTRACTS

Produced from the Course and Section Analysis System

A. INTRODUCTION

The *STATISTICAL ABSTRACTS* is an intercampus summary of reports showing the instructional workload and the financial resources of academic departments offering courses during the Fall 1994 semester. Included are six reports which utilize basic formulas developed for the 1976 through 1993 editions and continued in the 1994 edition. The first four reports display information only for Fall 1994 with the fifth and sixth reports showing trend data for twenty years. Information has again been aggregated using CASA-modified HEGIS discipline codes which are assigned by each campus to individual courses based upon the content of the course.

STATISTICAL ABSTRACTS has been produced from State University's official Course and Section Analysis (CASA) system. The 30 campuses participating in the Fall 1994 project initialized their files with System Administration during the period from early October through January. The system was subsequently updated until the campuses and System Administration were satisfied with the integrity of the data.

B. OVERVIEW

CASA was conceptualized, developed and implemented for the Fall 1972 cycle. It is an automated system designed to collect, process and report information on:

- faculty, students, and department workload
- costs of instruction as measured by such factors as credit hours and/or contact hours
- utilization of instructional facilities
- course content and level of instruction
- several other aspects of higher education typically reviewed and analyzed by managers.

CASA was constructed so that its terms and definitions would be generally compatible with all the other data collection efforts in which the University participates - local, statewide and national. Its census date is the end of the third week of classes for full semester courses. While various enhancements have been made over the years, the basic structure of the system dates back to 1972. This continuity facilitates the conduct of trend studies for participating institutions and the State University system as a whole.

Although the capability to develop and process a CASA file for each semester or quarter exists, at the present time only the Fall semester of each year is used in intercampus reports such as the *STATISTICAL ABSTRACTS*. In Fall 1994, 30 State-operated/funded institutions submitted CASA files.

C. CHANGES for FALL 1994

The conversion of courses identified as having the subject matter "Law" (HEGIS codes 14XX) so as to be included within the discipline "Business, Management and Law" has been completed for all past years. Prior to 1993, courses taught within this area were included within the broad discipline "Other". The trend tables (5, 6 and 6I) now reflect this change for the years 1975 to the present.

D. PRODUCTS: STATISTICAL ABSTRACTS

More than 40 comprehensive and detailed production reports are available to campus CASA Coordinators at any time during the CASA cycle. While these are very helpful locally, they are limited for intercampus comparisons. The most important report produced exclusively from the CASA system that provides intercampus summary information is the *STATISTICAL ABSTRACTS*.

Created for the Fall 1976 reporting period, the *STATISTICAL ABSTRACTS* uses percentage distributions and ratios, where appropriate, as a style of presentation to facilitate making comparisons. In general, information is provided with each percentage distribution enabling an analyst with only minor computation to recover the underlying raw data. This design has made the publication useful to administrators interested in profile and summary without resorting to the desk calculator. The *STATISTICAL ABSTRACTS* also divides information on graduate level instruction into beginning graduate and advanced graduate levels.

Within the *STATISTICAL ABSTRACTS*, class size is utilized rather than section size as a report element and describes the number of students in the classroom. Class size is a summary of the sizes of only those sections conducted in lecture, seminar, recitation, and laboratory instructional mode. Tutorial and other types of non-classroom instruction are thus excluded for this calculation.

During this past year, a methodology was developed to combine the data from the CASA system with data from within the Student Data File. By using the costs found within CASA along with the patterns of course enrollment of individual students as found in the Student Data file, overall costs for operating given programs of instruction can be determined. Tables showing these costs have been distributed to the campuses.

E. REPORT ELEMENTS

A description of the elements included for study in this compilation of reports is contained on this and the following pages:

***ACADEMIC RANK*:**

The academic rank of teaching faculty is designated in accordance with SUNY appointment procedures and is determined by the permanent titles they hold, including Full Professor, Associate Professor, Assistant Professor, Instructor, Lecturer, and Teaching Assistant. Additional categories identify personnel paid out of temporary service funds, those who contribute their services, and personnel who have no academic rank (e.g., administrators). Credit hours are recorded for all sections, regardless of whether they are taught by an individual with academic rank or by an individual with another classification

***CAMPUS*:**

Thirty (30) State-operated/funded institutions participated in the CASA project for Fall 1994. This includes the four doctoral level institutions, twelve of the thirteen University Colleges, one of the four Health Sciences Centers, three of the four Specialized Colleges, four of the five statutory Colleges -- Ceramics and three of the Cornell Colleges, and the six Colleges of Technology/Agriculture. Given the specialized nature of health-related instruction, Health Sciences courses at Buffalo Center, courses in the professional health areas at Stony Brook, the Health Science Centers at Brooklyn and Syracuse, Optometry and the Veterinary College at Cornell are excluded as is Empire State College because of the special nature of its individualized, contract-specific instruction.

***CLASS SIZE*:**

Class size is a summary of the sizes of only those sections conducted in lecture, seminar, recitation, and laboratory mode and represents the ratio of weekly student contact hours to weekly faculty contact hours. Tutorial and other types of non-classroom instruction are excluded.

***COURSE LEVEL*:**

The instructional level of a course identifies the level of student at which the course is primarily directed. Three levels are defined: lower, upper, and graduate. In CASA, an advanced graduate section is defined as a graduate level section in which at least half the enrollment is made up of advanced graduate students.

***DISCIPLINE*:**

A discipline is a broad area of knowledge used to group courses into a few categories for general reporting. Each course is assigned to a discipline specialty within the taxonomy cited below. Courses are coded by each institution based upon their content. Thus, discipline code describes the area of knowledge of the course and is not necessarily directly related to the academic unit offering the course, nor the degree program which requires it, nor the background of the students taking the course.

Reference: Huff, Robert A., *A Taxonomy of Instructional Programs in Higher Education*, U. S. Government Printing Office, Catalog No. HE5.250:50064, Washington, D.C., 1970. The HEGIS codes were expanded by the Central Staff Office of Institutional Research so that SUNY institutions could specifically code the content of courses which otherwise would have to be reported as XX99, Other.

The more than 500 discipline specialties are combined into the following nineteen broad discipline groups specifically serving State University's need for summarization:

Discipline Categories

1. Biological Sciences and Health Professions
2. Business, Management & Law
3. Education
4. Fine and Applied Arts
5. Foreign Languages and Letters
6. Mathematics and Computer Science
7. Physical Sciences and Engineering
8. Psychology
9. Social Sciences
10. Other
11. Agricultural and Natural Science Technologies
12. Business and Commerce Technologies
13. Communication, Printed Media and Design Technologies
14. Data Processing Technologies
15. Education Technologies
16. Foods and Home Economics Related Technologies
17. Health Services and Paramedical Technologies
18. Mechanical Engineering and Agricultural Engineering
19. Public Service Related Technologies.

Only the first ten categories are used to summarize the activity of the senior institutions. A different grouping of the discipline specialties is used to summarize the activity of the Colleges of Technology/Agriculture, necessitating the use of all nineteen categories.

The National Center for Education Statistics (NCES) released a new academic program taxonomy in February 1981: *A Classification of Instructional Programs*. This taxonomy is more comprehensive than the old HEGIS taxonomy and is more descriptive of the activities of all levels of education. The new taxonomy will be implemented in CASA sometime in the future for use by the colleges in coding their courses. This project will have long-term implications relative to the computer resources necessary to change our reports, including the *STATISTICAL ABSTRACTS*.

ENROLLMENT:

Enrollment is the number of students in the sections of a course. Anyone registered for credit, regardless of full-time or part-time status, is included. Auditors and post-doctoral enrollees are excluded.

FULL-TIME EQUIVALENT WORKLOAD (FTE WKLD):

FTE workload is a unit of measure usually derived from student credit hours. One FTE workload is equivalent to 15 student credit hours in undergraduate courses, or 12 student credit hours in graduate courses. Health first-professional and doctoral student FTEs are calculated as follows: one FTE for first professionals in the health sciences, one FTE for full-time ADVANCED GRADUATE STUDENTS, 0.75 FTE for part-time ADVANCED GRADUATE STUDENTS.

FULL-TIME EQUIVALENT FACULTY (FTE Faculty):

Like full-time equivalent workload, FTE faculty is a unit of measure to equate faculty appointments of various fractions of full-time status to full-time appointments. Full-time faculty equal one FTE. Part-time faculty appointment fractions are accumulated to an equivalency of full-time appointments. The full-time or part-time status of faculty is generally defined by contract and for purposes here is extracted from appropriate personnel records. Special procedures exist for imputing an FTE for temporary service faculty, contributed service staff, etc.

INSTRUCTION and DEPARTMENTAL RESEARCH (I&DR)

Instruction and Departmental Research represents the budget category used for academic departments as well as dean's accounts charged with administrative duties within this area. While most individuals carrying out the instructional activity will be budgeted within this category, persons budgeted to other categories (e.g. organized research, organized activities, general administration, etc.) will on occasion provide the instruction in a given course.

INSTRUCTION TYPE:

The primary instructional mode of a section is classified from the following: lecture, seminar, recitation, laboratory or other group activity, tutorial, independent study and programmed instruction. A section is classified as using programmed type of instruction if there is generally no instructor expected, scheduled, or present; e.g., television courses, computer-assisted instruction, etc. A section has a single type of instruction but a course may be a composite of several types of instruction. Each time the mode of instruction changes, a new section is assigned to the course even when the same group of students is participating.

SECTION:

A section is a group of students assembled for instruction in regularly required meetings wherein the instructional mode is fixed. For example, a group of students meeting on Monday, Wednesday, and Friday for lectures is a single section. A separate section is identified for each different type of instruction even though the same group of students is involved. Therefore, a single group of students meeting Monday and Wednesday for lectures and on Friday for a laboratory constitute two sections. A section is identified as having a single instructional mode. When the instructional mode is tutorial, each student is regarded as a separate section because the instructor meets with individual students separately.

STUDENT CREDIT HOURS (SCRH)

Student credit hours refers to the number of semester credit hours awarded through the course in progress toward a degree, certificate, or other formal award. Certain courses, including physical education, follow special rules for the assignment of student credit hours.

STUDENT/FACULTY RATIO:

This ratio is calculated by dividing the full-time equivalent student workload by the full-time equivalent faculty,

[FTE WKLD/FTE Faculty]

STUDENT LEVEL:

The level of a given student is determined by the following criteria-

Lower Division Student | For complete definition, see State University
Upper Division Student | of New York, Office of Institutional Research, *Official Glossary of Terms and Supporting Documents for Uniform Reporting of Enrollment, Degrees and Workload.* (June, 1994)

Beginning Graduate --

A student who meets any one (or more) of the following conditions:

a) A student enrolled in a doctoral degree program or Graduate Certificate program who has accumulated fewer than 24 semester credit hours beyond their bachelor's degree and who does not hold a master's degree in any field.

b) A student enrolled in a first professional degree program.

c) A graduate student in a master's program.

d) A graduate student not admitted to a formal program.

Advanced Graduate --

A student enrolled in a doctoral degree program or graduate certificate program (Certificate of Advanced Study, Educational Specialist, University Certificate) who:

a) holds a master's degree in any field, or who

b) has accumulated 24 or more semester credit hours beyond their bachelor's degree.

UNIT COST:

Four types of unit costs are defined to assist in making cost comparisons for various purposes. The salary unit cost is conveniently thought of as the annual faculty salary divided by the total number of credit hours attempted in the courses taught by this faculty member. The support unit cost generally refers to the remaining departmental expenditures after instructional salaries are removed. Support Costs are unitized by the same divisor, i.e., student credit hours. Direct costs for the Instruction and Departmental Research teaching department are obtained from addition of the salary and support unit costs. A fourth type of cost is called "other I&DR support." Dean's accounts and other Instruction and Departmental Research departments not offering instruction are omitted from all standard CASA cost calculations. Inasmuch as these accounts do support the instructional process, it is appropriate to include their expenditures when examining the different sources of teaching support. These "Other Costs" appear in summary form only for all disciplines and all courses on Report 1 of the *Statistical Abstracts*.

WEEKLY FACULTY CONTACT HOURS (WFCOH):

The weekly faculty contact hours for a staff member are the number of hours in a week the staff member meets with classes in a formal instructional environment or in credit-bearing tutorial sessions.

WEEKLY STUDENT CONTACT HOURS (WSCOH):

The weekly student contact hours for a course are the number of hours in a week all students enrolled in the course spend in a formal instructional environment or in credit-bearing tutorial sessions.

F. FORMAT OF REPORTS AND GRAPHS

The statistical displays are contained in TWO BOOKLETS which comprise this publication. The format and order of the reports have been organized as follows:

1.)*STATISTICAL ABSTRACTS*--The first booklet in this two-part release consists of two major sections.

SECTION I: Overview, Background, Definitions, etc.

SECTION II: Detail Reports and Graphs.

2.) *SUPPLEMENT TO STATISTICAL ABSTRACTS*--The second booklet is a companion to the first and contains the expanded version of Report 6 and the 6.I report. These reports contain provide concise numeric information for multiple years on FTE faculty and FTE (student) workload frequently used by analysts and researchers in models and simulations.

The graphics included with this year's report illustrate a portion of the vast amount of information carried within CASA. Essentially, CASA tracks the product of the SUNY system (instruction) as recorded by FTE student workload and student credit hours, the deliverers of the product (FTE faculty), and the direct cost for delivering this product. The graphs illustrate different aspects of these three factors along with shifts in subsets of these elements such as disciplines and course level recorded within the system since 1975. For all graphs, any data pertaining to the Health Science Centers and Optometry has been removed. While data was collected from these institutions in the early years of CASA, only a portion of the data for Stony Brook HSC is still submitted. Thus for the sake of consistency, all of this data within the system is removed prior to producing the graphics.

G. DESCRIPTION OF REPORTS

EACH *STATISTICAL ABSTRACTS* REPORT DISPLAYS AN "ALL INSTITUTIONS" TOTAL.

REPORT 1: Selected Cost Factors by Discipline Category

The first table in this series displays the full I&DR costs on a per credit hour basis for each institution. In calculating the support costs of instruction shown in the other 103 tables in this series, CASA includes only teaching departments within the Instruction and Departmental Research (I&DR) function. Other I&DR departments not engaged in instruction are omitted from standard cost calculations. These accounts, which typically include dean's accounts and academic equipment replacement accounts, support different teaching departments to varying degrees and should be included in a summary report. By and large, the only I&DR departments excluded from this additional report are summer sessions and accessory instruction accounts.

The full allocation of expenditures from non-teaching academic (I&DR) accounts to the specific departments and courses they support would require very complex algorithms, major revisions to computer programs, and a detailed expenditure file with consistent, uniform sub-accounting procedures and entries. We are not sure the benefits of a new level of detailed reporting would be justified in terms of their costs. Thus, for the foreseeable future, we will include just one additional summary table in the *STATISTICAL ABSTRACTS* showing the additional I&DR costs for the institution as a whole (all courses, all disciplines). This table will be found on page 8 of this publication.

Inasmuch as CASA is concerned with the instructional workload of SUNY faculty, the amounts expended by various campuses for accessory instruction are not included in this summary. These student credit hours are not generated by our faculty and are not reported by the institutions in CASA. Thus, the expenditures incurred for accessory credits are also excluded. According to an end of the fiscal year budget file, the following amounts were expended accessory instruction in fiscal 1994-95 for CASA-participating institutions:

Environmental Science and Forestry	$ 2,393,585
Ceramics	1,618,000
Agriculture and Life Sciences	12,194,800
Human Ecology	
Industrial and Labor Relations	
TOTAL	$16,206,385

The following elements are given by discipline category and by course level in the Selected Cost Factors report series:

Report Elements

Student Credit Hours (SCRH)
Class Size
Student/Faculty Ratio (S/F)
FTE Faculty
FTE Workload (FTE WKLD)
Salary Per Student Credit Hour (SAL PER SCRH)
Support Costs Per Student Credit Hour (SUPPORT PER SCRH)
Instruction and Departmental Costs Per Student Credit Hour
(I&DR PER SCRH)

This report series displays summary tables for all courses and all disciplines plus the full detail tables for each of the nineteen broad discipline categories listed on page x. Within the discipline categories are tables for the following levels of instruction and aggregations of levels of instruction:

all courses
undergraduate courses
graduate courses
lower division courses
upper division courses
beginning graduate courses
advanced graduate courses

Report Series "1" has 103 tables, all of which include summaries by institution type followed by individual institution displays. Crosswalks appear on pages 8 and 204-205 to assist the reader who is unfamiliar with the discipline categories, their names and components. A percent column which shows the importance of the discipline's student credit hours to the level of the course is included in each table.

This official publication is based on accounting data as it is in July after the SUNY accounting file for fiscal 1994-95 lapsed. This is the fourth year that the fiscal year for SUNY encompassed a July 1 to June 30 time frame.

REPORT 2: Faculty and Student Contact Hours by Instruction Type

Report Series "2" exhibits the percentage distribution of weekly faculty and weekly student contact hours (for each institution and institution type) for each of the following types of instruction: class (includes courses utilizing lecture, seminar and recitation modes of instruction), laboratory, tutorial, independent, and programmed. The percentage distribution of the faculty's contact time is presented on the left under the title "WFCOH", the abbreviation for weekly faculty contact hours. The percentage distribution of the weekly student contact hours is presented on the right under the title "WSCOH", the abbreviation for weekly student contact hours.

This report series follows the same format as Report Series "1" in the use of summary tables and use of detail tables for the 19 discipline categories. The crosswalks on pages 8 and 204-205 should be used with this report series as well.

REPORT 3:Distribution of Student Credit Hours by Course Level and Student Level

The third series of reports displays for each course level the percentage distribution of student credit hours by level of student taking the courses. Percentage information is displayed with a lead column showing the total number of student credit hours to permit recovery of the underlying raw data if desired. Each table includes a summary for all campuses plus summaries by institution type followed by individual institution displays. The following displays are included within the four tables that comprise Report 3 --

Student Credit Hours for All Courses
Student Credit Hours for Undergraduate Courses
Student Credit Hours for Graduate Courses
Student Credit Hours for Lower Division Courses
Student Credit Hours for Upper Division Courses
Student Credit Hours for Beginning Graduate Courses
Student Credit Hours for Advanced Graduate Courses

REPORT 4: Personnel Positions - Full-time Equivalents

These reports are different from previous years in that they only describe filled positions. Vacant positions are excluded. Campuses can fill positions as necessary within the funding guidelines of their financial plan.

The purpose of Report 4 is to reconcile CASA with the University's budgeted positions, to show the effort of teaching-titled individuals and to account for the FTE involved with instruction. To do this, Report 4 arrays the total full time equivalent (FTE) of all persons contained on the personnel file utilized within CASA according to their title code and the funding source of their salary. The FTE associated with each personnel record is grouped with respect to those with teaching titles (any with academic rank -- see listing under Report Elements on page viii) and those with non-teaching titles (anyone without academic rank.) In utilizing these tables, one should remember that FTE is a concept which allows several part-time (or portions of) individuals to be equated to an equivalent number of full-time individuals. Also, any given individual may have his/her FTE split between two or more functions and/or title codes. For example, a faculty person who is budgeted partly to organized research (a non-I&DR function) and partly to an academic department (I&DR) will have the appropriate portions of his/her position summed within two differing cells on these tables. The CASA system is not a full activity analysis of faculty effort as it only tracks the contact hours with students in an organized instructional setting leading to a degree or other formal award.

The personnel file used within CASA is a snap-shot of the University personnel system based on a given payroll late in the Fall semester. Several modifications are made to this file to:

1. Add contributed service personnel (since these persons are not on the payroll.) An appropriate FTE is given to these persons if they have more than 4.99 weekly faculty contact hour

2. compensation when FTE is not provided by the campus.)

3. Split the FTE of non-teaching titled individuals involved in instruction between teaching duties and "regular" duties (based on weekly faculty contact hours involved in instruction.)

Files for non-CASA participants - Empire, Optometry and the Health Sciences Centers- have been utilized without modification.

The tables in this report separate IFR, Endowed and Other positions not teaching as an aid in reconciling CASA data with budget information. Although State funds and IFR monies may both be used to hire individuals under personal service-regular or personal service-temporary, the temporary service category in this report pertains to positions funded just by State monies. IFR positions are shown separately and include positions funded by regular and temporary monies.

The data within this report are displayed within five tables showing the following:

1. **CREDIT HOUR PRODUCING ACTIVITIES** - the institutional assignment of positions with respect to credit hour producing activities. This table shows a breakdown of the source of the total FTE utilized in the instructional function within CASA as determined by title code and budgetary source.

2. **OTHER THAN CREDIT HOUR PRODUCING ACTIVITIES** - the institutional FTE of positions in other than credit hour producing activities. The first six columns of this table are devoted to a breakdown of the status of teaching titled FTE's not involved in instructional activity within CASA. There are several important points to remember regarding this information, especially with regard to the column "Other Assignment". These points include:

- Many "Teaching Title" FTE positions for the Health Sciences Centers default to the "Non-credit Hour Producing" category of Report 4. Although most of these FTE are involved in instruction, that effort is not reported by the institutions in CASA. For this reason, this report has been divided between institutions reporting in CASA and institutions (or portions of institutions) not reporting data in CASA so that this distinction may be made more readily.

- Clinical Campus, Health Sciences Centers (except for three departments at Stony Brook), and E.O.C. FTE positions have been disaggregated from their "core" campuses and included as part of the non-CASA institutions since none of the teaching activity for these components are included within CASA.

- CASA is not a complete activity analysis of faculty titled individuals. It should be noted that classroom teaching is only one of the responsibilities of faculty titled individuals. In any given semester, faculty will also be involved to varying degrees in research, public service, administrative responsibilities, committee work, curriculum development, or other activities. Occasionally, these activities entail a formal, partial "FTE" or whole "FTE" assignment to a function other than direct instruction. This may be in support of the instructional process or in a related function. In either case, these "FTE" will show as not generating contact hours in courses reported in CASA, but will show in the "Other Assignment" category.

Column seven displays the NON-TEACHING TITLES group showing the full-time equivalence of non-instructional staff lines, with State-funded personal service-regular and temporary plus contributed service accumulated within the same grouping; this column is all inclusive for non-teaching titles and contains filled positions as well as persons on leave. IFR, Endowed and Other are listed separately in columns eight and nine showing subdivisions between the I&DR versus non-I&DR function.

The final column on the right of the second table is the TOTAL OF ALL FILLED STATE FUNDED POSITIONS. This column includes Teaching Assistants but excludes other temporary service personnel, IFR and contributed service.

3. **STATE FUNDED TEACHING TITLES** - a one page summary of the institutional assignment of teaching title personnel, both I&DR and non-I&DR funded.

4 & 5. **ACTIVITIES OF TEACHING TITLED FTE ON OTHER ASSIGNMENT** - These tables are included to give a more detailed summary of the activities of teaching titled FTE on "Other Assignment" as shown on the second and third tables of this report. Details concerning these two tables are imbedded within the report itself.

Report 4 displays for each institution the total filled FTE positions plus the additional FTE personnel resources used in the instructional process. Additional FTE resources include contributed service, IFR staff and temporary service personnel.

REPORT 5: Percent FTE Workload by Discipline Categories and Course Level

This report displays the percentage of FTE (Student) Workload for each of the same 19 discipline categories as used for Reports 1 and 2. Seven tables are presented which contain percentage distributions by course level and aggregations of course level:

1. Percent FTE Workload by Discipline Categories for All Courses.
2. Percent FTE Workload by Discipline Categories for Undergraduate Courses.
3. Percent FTE Workload by Discipline Categories for Graduate Courses.
4. Percent FTE Workload by Discipline Categories for Lower Division Courses.
5. Percent FTE Workload by Discipline Categories for Upper Division Courses.
6. Percent FTE Workload by Discipline Categories for Beginning Graduate Courses
7. Percent FTE Workload by Discipline Categories for Advanced Graduate Courses.

The observation of trends is facilitated through the display of information for Fall 1975 through Fall 1994. Each table includes a summary for all campuses plus summaries by institution type, followed by individual institution displays.

REPORT 6: Trends of Selected Indicators: Fall 1975 through Fall 1994

This report displays basic information for each institution, every institution type and all institutions for Fall 1975 through Fall 1994, thus facilitating the observation of trends over a consecutive twenty-year period. The following elements are included in the report:

1. Student Credit Hours (SCRH)
2. Class Size
3. FTE Faculty
4. FTE Workload (FTE WKLD)
5. Student/Faculty Ratios specific to each level of instruction.

NOTE: An expanded version of Report 6 is included in a companion booklet, *FALL 1994 STATISTICAL ABSTRACTS SUPPLEMENT* in which trend information by discipline category for FTE faculty and FTE (student) workload is presented for the last twenty years.

Also included in the SUPPLEMENT is Report 6.I which displays summaries of the change experienced by individual institutions by discipline for a twenty-year period.

H. KEY POINTS

1) CASA officially collects data for just the Fall semester. Expenditures and/or encumbrances for the FISCAL YEAR are applied against credit and contact hours for ONE SEMESTER.

2) "Support Costs" reflect the following categories of expense only from departments within the I&DR function that offer credit courses: non-instructional salaries of filled positions budgeted to the department, supplies and expense, temporary service, equipment, recharges, other. Expenses associated with dean's accounts and other I&DR departments that do not offer courses are excluded from standard CASA cost calculations. These additional expenditures are, however, included in the "Full I&DR Costs" table within the Report 1 series of the *Fall 1994 STATISTICAL ABSTRACTS*.

3) Expenditure data was "frozen" for all departments from the beginning of July lapse SUNY Accounting Master File for fiscal 1994-95.

4) The student/faculty ratios by discipline and level of instruction are used in the planning/budgeting process to model institutional faculty need requirements in the evaluation of prospective budget requests.

5) Courses sponsored through Cornell's School of Industrial and Labor Relations off campus program were not reported to us in CASA.

6) Courses taught within the health sciences area at Stony Brook are shown separately from the core campus. Only Nursing, Allied Health and Social Welfare are included in CASA. Medicine, Dentistry and Basic Health were not reported to us. The other I&DR expenditures from these and related accounts have been excluded from our reports, including the full I&DR costs table.

7) Environmental Science and Forestry data include courses offered during the summer which are an integral part of their Fall program.

8) Fringe benefits are excluded from all cost calculations: direct salary, direct support and other I&DR support.

I. ACKNOWLEDGMENTS

As always, the *STATISTICAL ABSTRACTS* would not have been possible without the continuous hard work and support of each participating institution. Much perseverance and skill on the part of each campus CASA Coordinator was needed, and for this we are grateful.

We would especially like to extend our thanks and best wishes to Billie LaBrie who retired this year from the Operations Section of the System Administration Computer Center. Billie has been highly skillful in dealing with computer problems within the CASA system for many years and her talents will be missed.

Vince Murphy, who has been one of our main contacts in the physical facilities portion of CASA also retired this year; his efforts will likewise be missed.

Other personnel at System Administration who have contributed efforts to the CASA system include:

Computer Center --
    Operations Section: Ann Flaherty, Bob Hammond, Dominic Montello and Len Steele

    Programming Unit: Maria Swiencicky and Stasia Mierzwa

Facilities Management and Support: Shirley Trzaskos

We also thank Kathleen Bartoszewicz and Vikki Mazzone of our secretarial staff for aid in the preparation of the final transcript and distribution of all copies of the publication.

Tommy Annas
Assistant Provost for Institutional Research

Activities of Teaching Titled FTE's on Other Assignment with no Contact Hours in CASA

In order to clarify the meaning of the column "Other Assignment" which has been a part of Report 4, two tables have been formulated to indicate the activities of individuals (or portions of individuals) who have teaching titles, are not on leave, and show no teaching activity within CASA. All of the numbers shown are in FTE (full-time equivalents.) It should be noted that for a person to be shown in CASA as an instructor, s/he must be associated with a regular credit hour producing course or one for which credits are imputed. For example, a faculty titled individual in charge of a center for improving writing might be available to help any student for a variety of courses involving writing. However, since this activity is not directly connected to any one particular credit bearing course, none of this activity would be shown in CASA. One table displays the activities for those budgeted to I&DR (instruction and departmental research) function and the other for those budgeted to non-I&DR functions since the expectation of activity differs accordingly.

The tables split the individuals involved between 'regular faculty' -- those with job titles of professor, associate professor, assistant professor, instructor and lecturer -- and graduate students with the title teaching assistant. While teaching assistant is classified as a teaching title, the work expectations in many cases are in support services to instruction such as paper grading or conducting non-required help sessions which do not generate contact hours within CASA.

The data delineated in these tables was gathered after the CASA files had been closed for the cycle. In order to avoid a too detailed and lengthy table, various activities were grouped together. The following shows the types of activities included under the column headings used.

Column Heading	Activities
Instructional Support Services	Academic assistance/tutoring Curriculum/course development Staffing learning resource centers Paper grading/proctoring Fieldwork coordinator or supervisor Technical support (e.g. accompanist) Teaching English as a second language
Research	Working on sponsored research or departmental research. (In some instances, the instructional activity of I&DR faculty in this position are met by temp service individuals who are paid through the research contract)
Administration	Temporary or permanent assignment to an administrative position, e.g., in a dean's office.

Column Heading	**Activities**
Organized Activities	Campus School Organized athletics Theater or Dance Museum - Art Gallery
Student Services	Counseling, advisement, recruitment Career development
Accounting lines > 1 Teaching	This has to do with how the CASA course file interacts with the accounting system. If a faculty person is budgeted to two or more departments, but only teaches in one of those departments during a given semester, the portion of FTE budgeted to the department where no teaching occurs will default to 'Other Activity'. In many of these cases, the person teaches in one department during the fall and the other during the spring semester. The Statistical Abstracts only displays their fall instructional effort.
Other	UUP officers (the top two offices) Sick leave (using accumulated days rather than a leave) Coding errors within personnel file Visiting Scholar/ Guest lecturer Teach double load in spring term (none in fall) Special centers, e.g., Economics Research, Business Concerns
